Re: Asbestos Project Monitor Visual Clearance and Air Sampling Services  
T. Barrington Student Union Toilet Rooms  
SUCF Project No. 12353  
State University of New York at Potsdam  
Potsdam, New York  
ATL Report No. CT6308AA-01-10-12

Ladies/Gentlemen:

In accordance with the scope of services outlined in our contract (ATL No. CT5998-100-06-12), dated June 14, 2012, and authorized by Purchase Order No. 301428 on June 25, 2012, Atlantic Testing Laboratories, Limited (ATL) performed asbestos project monitor visual clearance and air sampling services. These services were performed from October 12 through 18, 2012. The project consisted of the removal of pipe thermal system insulation (TSI) elbows and fittings in the west wing first and second floor bathrooms, and floor tile and mastic in the west wing second floor bathrooms, of the T. Barrington Student Union, located on the State University of New York (SUNY) at Potsdam campus, Potsdam, St. Lawrence County, New York.

The asbestos abatement services were provided by LVI Environmental Services, Inc. Air sampling activities were conducted in accordance with 12 NYCRR 56-4) regulations. Air samples were collected and submitted to a New York State Department of Health approved laboratory (ELAP No. 11480) and analyzed by phase contrast microscopy (PCM) and transmission electron microscopy (TEM) NIOSH 7402 method. The clearance criteria for the work area was determined to be in compliance with 12 NYCRR 56-9.2 regulations. The laboratory reports, sample custody documentation, and submittals are enclosed.

## Reporting Notes:

(1) Fibers/cc cannot be calculated for samples (or blanks) with no air volume.

By NIOSH 7400(A) Method, Issue #2, 8/15/94: Using an Olympus, Model CHS PCM microscope, Serial #0A0076; Analyzed by: Devin M. Alyee (IS). Date Analyzed: 10/16/2012.  
 Limit of Detection= 5.5 fibers /100 fields or 7 fibers/mm<sup>2</sup>. Blank analyses are reported when available, however are not used to adjust results of associated samples in this report. This report relates ONLY to the sample analysis expressed as fibers/sq mm of filter area. ND=No fibers observed. NA= Not Analyzed. Walton-Beckett graticle field area = 0.00785 mm<sup>2</sup>. TWA = 8 Hr TWA calculation assumes zero exposure for remainder of 8 hr period not sampled. Upper 95% Confidence limit (Employers Compliance Test)- Calculated as a one sided UCL to determine 95% certainty of compliance with the 0.01 fiber/cc standard. Estimated RSD: IntraLab St=0.405, InterLab St=0.45, (NY ELAP Lab 11480, AHA Lab # 102843)

#### Reporting Notes:

(1) Fibers/cc cannot be calculated for samples (or blanks) with no air volume.

By NIOSH 7400(A) Method, Issue #2, 8/15/94; Using an Olympus, Model CHS PCM microscope, Serial #0A0076; Analyzed by: Devin M. Abjee (tg). Date Analyzed: 10/16/2012;  
 Limit of Detection= 5.5 fibers /100 fields or 7 fibers/mm<sup>2</sup>; Blank analyses are reported when available, however are not used to adjust results of associated samples in this report. This report releases ONLY to the sample analysis expressed as fibers/cc mm of filter area; ND=No fibers observed; N/A= Not Analyzed; Walton-Beckett graticle field area = 0.00785 mm<sup>2</sup>; TWA = 8 H; TWA calculation assumes zero exposure for remainder of 8 hr period not sampled; Upper 95% Confidence limit (Employers Compliance Test)- Calculated as a one sided UCL to determine 95% certainty of compliance with the 0.01 fiber/cc standard; Estimated RSD: Intralab S=0.405, Interlab S=0.45, (NY ELAP Lab 11480, AIHA Lab # 102843)

**Reporting Notes:**

(1) Fibers/cc cannot be calculated for samples (or blanks) with no air volume.

By NIOSH 7400(A) Method, Issue #2, 8/15/94; Using an Olympus, Model CHS PCM microscope, Serial #OA0076; Analyzed by: Devin M. Abiye (tg); Date Analyzed: 10/16/2012.  
 Limit of Detection: 5.5 fibers /100 fields or 7 fibers/mm<sup>2</sup>; Blank analyses are reported when available, however are not used to adjust results of associated samples in this report. This report relates ONLY to the sample analysis expressed as fibers/sq. mm of filter area: ND=No fibers observed; NA= Not Analyzed; Walton-Beckett graticle field area = 0.00785 mm<sup>2</sup>; TWA = 8 Hr TWA calculation assumes zero exposure for remainder of 8 hr period not sampled; Upper 95% Confidence limit (Employers Compliance Test)- Calculated as a one sided UCL to determine 95% certainty of compliance with the 0.01 fiber/cc standard; Estimated RSD: Intralab S=0.403, Interlab S=0.45, (NY ELAP Lab 11480, AUHA Lab # 102843)

## Reporting Notes:

(1) Fibers/cc cannot be calculated for samples (or blanks) with no air volume.

By NIOSH 7400(A) Method, Issue #2, 8/15/94; Using an Olympus, Model CTS PCM microscope, Serial #OA0076; Analyzed by: Devin M. Ayee (g); Date Analyzed: 10/16/2012; Limit of Detection= 5.5 fibers /100 fields or 7 fibers/mm<sup>2</sup>; Blank analyses are reported when available, however are not used to adjust results of associated samples in this report. This report relates ONLY to the sample analysis expressed as fibers/cc mm of filter area. ND=No fibers observed; NA= Not Analyzed; Walton-Beckett graticule field area = 0.00785 mm<sup>2</sup>; TWA = 8 Hr TWA calculation assumes zero exposure for remainder of 8 hr period not sampled; Upper 95% Confidence limit (Employers Compliance Test)- Calculated as a one sided UCL to determine 95% certainty of compliance with the 0.01 fiber/cc standard; Estimated RSD: Intralab S=0.405, Interlab S=0.45, (NY ELAP Lab 11480, AIHA Lab # 103843)

#### Reporting Notes:

(1) Fibers/cc cannot be calculated for samples (or blanks) with no air volume.

By NIOSH 7400(A) Method, Issue #2, 8/15/94; Using an Olympus Model CHS PCM microscope, Serial #DA0076; Analyzed by: Devin M. Ayres (tg)

Date Analyzed: 10/15/2012;

Limit of Detection= 5.5 Fibers/100 fields or 7 Fibers/mm<sup>2</sup>; Blank analyses are reported when available, however are not used to adjust results of associated samples in this report. This report relates ONLY to the sample analysis expressed as Fibers/cc min. of filter area. ND=No Fibers observed; NA= Not Analyzed; Walton-Beckett graticle field area = 0.00785 mm<sup>2</sup>; TWA = 8 Hr TWA calculation assumes zero exposure for remainder of 8 hr period not sampled; Upper 95% Confidence limit (Employers Compliance Test)- Calculated as a one sided UCL to determine 95% certainty of compliance with the 0.01 fiber/cc standard; Estimated RSD: IntraLab S=0.405, InterLab S=0.44, (NY ELAP Lab 11480, AHA Lab # 102843)

#### Reporting Notes:

(1) Fibers/cc cannot be calculated for samples (or blanks) with no air volume.

By NIOSH 7400(A) Method, Issue #2, 8/15/94; Using an Olympus Model CHS PCM microscope, Serial #OA0076; Analyzed by: Devin M. Ayres (tg); Date Analyzed: 10/16/2012;  
 Limit of Detection= 5.5 fibers/100 fields or 7 fibers/mm<sup>2</sup>; Blank analyses are reported when available, however are not used to adjust results of associated samples in this report. This report relates ONLY to the sample analysis expressed as fibers/cc, run of filter area. ND=No fibers observed. NA= Not Analyzed; Walton-Beckett graticule field area = 0.00785 mm<sup>2</sup>; TWA = 8 Hr TWA calculation assumes zero exposure for remainder of 8 hr period not sampled; Upper 95% Confidence Limit (Employers Compliance Test)- Calculated as a one sided UCL to determine 95% certainty of compliance with the 0.01 fiber/cc standard; Estimated RSD: Interlab S<sub>r</sub>=0.405, Interlab S<sub>d</sub>=0.45, (NY ELAP Lab 11480, AIHA Lab # 102843)

#### Reporting Notes:

(1) Fibers/cc cannot be calculated for samples (or blanks) with no air volume.

By NIOSH 7400(A) Method, Issue #2, 8/15/94; Using an Olympus, Model CHS PCM microscope, Serial #OA0076; Analyzed by: Bo Sun (tg)  
 Limit of Detection- 5.5 fibers /100 fields or 7 fibers/mm<sup>2</sup>. Blank analyses are reported when available, however are not used to adjust results of associated samples in this report. This report relates ONLY to the sample analysis expressed as fibers/sq mm of filter area. ND=No fibers observed; N/A= Not Analyzed; Walton-Beckett graticule field area = 0.00785 mm<sup>2</sup>. TWA = 8 Hr TWA calculation assumes zero exposure for remainder of 8 hr period not sampled; Upper 95% Confidence limit (Employers Compliance Test)- Calculated as a one sided UCL to determine 95% certainty of compliance with the 0.01 fiber/cc standard; Estimated RSD; Intralab S=0.405, Interlab S=0.45, (NY ELAP Lab 11480, AIEA Lab # 102843)

Duly Authorized Representative - Peter Demeropoulos:

This license has been issued in accordance with applicable provisions of Article 30 of the Labor Law of New York State and of the New York State Codes, Rules and Regulations (12 NYCRR Part 56). It is subject to suspension or revocation for a (1) serious violation of state, federal or local laws with regard to the conduct of an asbestos project, or (2) demonstrated lack of responsibility in the conduct of any job involving asbestos or asbestos material.

This license is valid only for the contractor named above and this license or a photocopy must be prominently displayed at the asbestos project worksite. This license verifies that all persons employed by the licensee on an asbestos project in New York State have been issued an Asbestos Certificate, appropriate for the type of work they perform, by the New York State Department of Labor.

|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 08:15 | ATL received a call this morning that SUNY Potsdam rep. Scott Hazen needed an project monitor for a project in the West <del>side</del> 1 <sup>st</sup> and 2 <sup>nd</sup> floor retrofits. ATL arrives on-site and talks to worker S who says LVI has been building the tents since Tuesday and needs a project monitor for final visual. The previous work had a full time project monitor but since ATL was on-site work was being done until this morning ATL will only be providing final visual clearance and air sampling services which was communicated to Scott Hazen at this time. |
| 10:00 | LVI says they are ready for a final visual of the 1 <sup>st</sup> floor tents 1-5. ATL suits up and inspects the tents. All of the tents have fiberglass insulation still inside them and ATL tells the supervisor, worker S that the fiberglass insulation is not a cleanable surface and must be removed for ATL to issue a visual clearance and run final clearance air samples. Also tent #3 had a fitting that still needed to be removed.                                                                                                                                                |
| 10:40 | Scott Hazen stops by and ATL explains to him that LVI will be removing the fiberglass insulation within their tents.                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 11:10 | LVI says they will have the tents ready for a final visual inspection after lunch. ATL will try to clear at least 3 tents so those final clearance samples can get set out today if possible. Worker S says there was 1 ft <sup>2</sup> of floor                                                                                                                                                                                                                                                                                                                                               |

| Time  | Field Notes                                                                                                                                                                                                                                                                                                                                                                                    |
|-------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|       | tile and marlic removed from Tent 6 on the 2 <sup>nd</sup> floor                                                                                                                                                                                                                                                                                                                               |
| 11:45 | ATL and LVI are off-site for lunch                                                                                                                                                                                                                                                                                                                                                             |
| 12:45 | ATL and LVI are back on-site. LVI still has 1 tent to finish on the 2 <sup>nd</sup> floor and 2 to finish on the first floor once they are done with all tents on each floor. ATL will give a visual                                                                                                                                                                                           |
| 13:15 | ATL hooks up the pumps and hopes vac for 3 sets of finals to test the circuits to make sure they will hold the power load on the 2 <sup>nd</sup> floor restroom.                                                                                                                                                                                                                               |
| 14:00 | The breaker didn't pop so it appears the load from the equipment will be ok. LVI still cleaning tents                                                                                                                                                                                                                                                                                          |
| 14:45 | ATL suits up and gives final visual inspections on the 1 <sup>st</sup> floor Tents 1-5 and the 2 <sup>nd</sup> floor Tents 6-8.                                                                                                                                                                                                                                                                |
| 15:45 | ATL completes final visual inspections. Tents 1-5, 7, and 8 appear to be clear of visible ACM mudded fittings. Tent 6 appears to be clear of visible ACM mudded fittings and floor tile and marlic. LVI is going to encapsulate the tent with an airless sprayer so ATL will wait at least 2 hours for the encapsulant droplets to settle out of the tent so as not to foul up the cartridges. |
| 18:45 | ATL is back on-site to run the finals for the three tents in the second floor restroom                                                                                                                                                                                                                                                                                                         |
| 18:55 | ATL starts samples running at 10 LPM.                                                                                                                                                                                                                                                                                                                                                          |
| 19:45 | ATL checks pumps, all appear to be operating fine                                                                                                                                                                                                                                                                                                                                              |
