

For the Library Workshop I assignment, you will use library resources to identify materials that meet the criteria listed. The entries you find will give you all of the information you need to answer the question in the format used for a “Works Cited” list. You will choose the format – MLA, APA, Chicago, Turabian, etc.

Start your research at the Libraries’ Web site.

You will find the books you need using **BearCat** – SUNY Potsdam Libraries’ online catalog.

- To find books “by” – search for the author’s name
- To find books “about” – search by subject
 - Search for subjects as keywords or browse a list of headings (Subject begins with...)
- BearCat records include all the information you need to locate the book and create your works cited entry.

To find articles, you can use the database of your choice but in class we used

Academic Search Complete

- To find material that covers more than one topic, use the Boolean operator “and” to connect your subjects
- Use the database narrowing and limiting features to find articles that meet your specific criteria for both magazines and scholarly articles

Your assignment and these notes will be made available to you under the “Courses” tab on the Subject Guide for Anthropology

The librarians in Crumb Library can assist you with completing your assignment. From the Libraries’ web pages, choose the “Ask a Librarian” link to find your options for connecting – in person or virtually.

Note: Ask Us 24/7 connects to a reference service that is always available and is staffed by librarians around the world – they can view our Subject Guides but may not be able to access some of our resources. When you use this service, you need to provide the librarian with additional information about your course and assignment
